

Ishida is our new line of scales Desna has added to our weighing equipment portfolio:

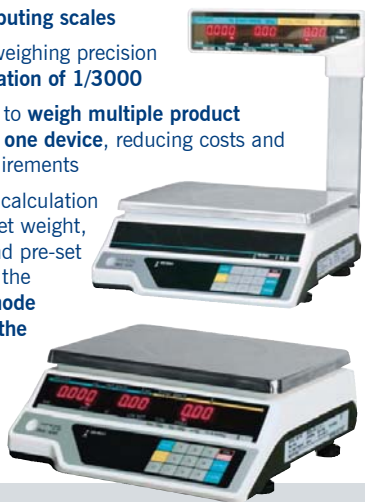

- Counter top scales
- Price computing scales with printers and labelers
- Portable scales for busy markets and stalls
- Bench scales for heavier products
- Waterproof scales

## Ishida Generic Scales

### INS-100

- Price computing scales
- Excellent weighing precision to a graduation of 1/3000
- The ability to weigh multiple product types with one device, reducing costs and space requirements
- Three tare calculation modes – net weight, keypad, and pre-set key – with the selected mode shown on the customer screen

### IG –Series

- Digital platform scales
- Excellent accuracy, with selectable gradations of up to 1/7000
- A simple-to-use tare function, which automatically stores your set net weights for each subsequent use
- A vertical operating display that is easy to read and operate
- A checking function that makes setting range limits and identifying incorrect measurements simple

### IPC

- Digital counter top portioning scales
- A broad weighing range from 1g to 30kg with multi-interval precision, all in a single device
- The only device of its price point capable of operating with two single-cell batteries, with a battery life of up to 500 hours
- A lightweight, space-saving model for easy portability
- Waterproof models available for low pressure washdown applications

### IW –Series

- Waterproof scales
- Constructed of water-proof stainless steel
- Water-proof load cell and display
- Checkweighing function
- Multi interval weighing range changes depending on product weight
- IW Series is ideal for food processing applications

UNI-3 L2 Pole with LCD Display

## Ishida Counter Top Scales – UNI Series

### UNI-3

- High quality display, with backlighting to ensure optimal brightness and legibility for all operators
- An expandable database to hold all product information and transaction details
- High-speed, high-quality printing of labels and receipts due to pre-set functions that you can change at any time

UNI-3 L1 Pole with Backlit Display

UNI-3 L1 Bench with Backlit Display

UNI-3 L1 Bench with LCD Display

### UNI-5

- A multi-window screen layout that displays tare, weight, unit price and total price, product name and scale connectivity status for easy, efficient operation
- Sophisticated virtual display options for the operator, to view receipts, coupons, labels and totals before printing
- A self-serve mode – ideal for busier supermarkets – made possible by an LCD customer-side display. This can also be used for displaying store messages and adverts to enhance sales

UNI-5 Bench

UNI-7 Pole

### UNI-7

- A pre-installed Web browser, allowing you to download data for printing or to be emailed to a designated site
- A compact design with the dual label and receipt cassette positioned at the front, freeing up more counter space for more fluent transactions
- An expandable memory, for holding visual files such as logos and store messages.
- Seven types: bench, pole, self-service, bakery, elevator with single printer, elevator with twin printer, hanging
